

Payment module (Pay pal Adaptive Gateway):

- User can see here Pay pal site status, Pay pal Email, Username, Pre approval, Gateway Status.
- Also user can test pay pal settings by clicking on Test Your Pay pal setting.
- User can edit Pay pal settings by clicking on edit.

The screenshot shows the 'Payment' module with a sub-section for 'Paypal Adaptive Gateway'. A table lists the gateway configuration. The 'Test Your Paypal Setting' button and the 'Edit' button in the 'Options' column are highlighted with red boxes.

	Site Status	Paypal Email	Username	Preapproval	Gateway Status	Options
1	sandbox	mihir.test.rockersinfo@gmail.com	mihir.test.rockersinfo_api1.gmail.com	Active	Active	Edit

The screenshot shows the 'Paypal Adaptive Payment Gateway' configuration form. The form includes various input fields for site status, application ID, email, username, password, signature, fees, and names. The 'Update', 'Test & Update', and 'Cancel' buttons are visible at the bottom.

Payment Module
